

Training and Development Governor Update: 2 September 2018

Training and development attended

7 governors attended a total of 13 different training and development events during 2017/18. Can provide a list if required.

Training Records

I've updated our individual training records and sent copies to Kerry before the end of the summer term. I will also send out to each of the governors so you can all check if the details are correct.

Skills Audit

We have all completed the skills audit within the last year. Do we want to complete it again or wait till next year?

Rather than undertaking another audit I wondered about asking governors if there is anything they would like training or development on and looking to address those.

Training 2018/19

We have already identified:

Safer Recruitment in Schools: RoSIS is three running courses throughout the year.

Appraisal training for Denise: RoSIS is running a course in the autumn term.

Andrew has already shared the RoSIS prospectus for 2018/19.

Next Steps

Send individual training plans to individual governors by 14/09/18.

Identify any training required for whole governing body (All).

Decide approach on identifying training needs/Skills Audit.

Upload training and development plan.

Make time at governors meetings once a term to reflect on training and development and the difference it has made (if any) to how we fulfil our role and to the children
