

Our Approach to teaching.....

Computing

We teach computing throughout the school.

Computing skills are embedded across the curriculum and are developed using laptops, PCs and a range of mobile technology including iPads.

Specific skills are taught in discrete sessions and also at the point of teaching when needed.

Teachers use Cornerstones to plan Projects which ensures that the National Curriculum objectives are covered.

Computing is taught each term and is made part of Project Based Learning to ensure learning is real to replicate the use of computing in everyday life.
